WASTEWATER INLET WORKS STRUCTURAL CONDITION ASSESSMENTS - LESSONS LEARNED

Whitsunday Water

International Public Works Conference (IPWC) 2019 - Hobart TAS

WIM Alliance

- 4,000 EP
- Design ADWF: 1.0 ML/d
- Current ADWF: 1.0 ML/d
- Activated sludge, single SBR, media filtration
- Discharge to Proserpine River

Proserpine Sewage Treatment Plant (STP)

- 25,000 EP
- Design ADWF: 6.25 ML/d
- Current ADWF: 3.0 ML/d
- Activated sludge, MBR (2 bioreactors, 4 trains)
- Discharge to Pioneer Bay Coral Sea

Cannonvale STP

- 97,000 EP
- Design ADWF: 22.3 ML/d
- Design PWWF: 111.5 ML/d
- Current ADWF Range: 12.9-19.9 ML/d
- Activated sludge (4 SBR), tertiary filtration, disinfection to recycled water, UV
- Rainfall trigger discharge to Baker's Creek

Mackay South Water Recycling Facility (MSWRF)

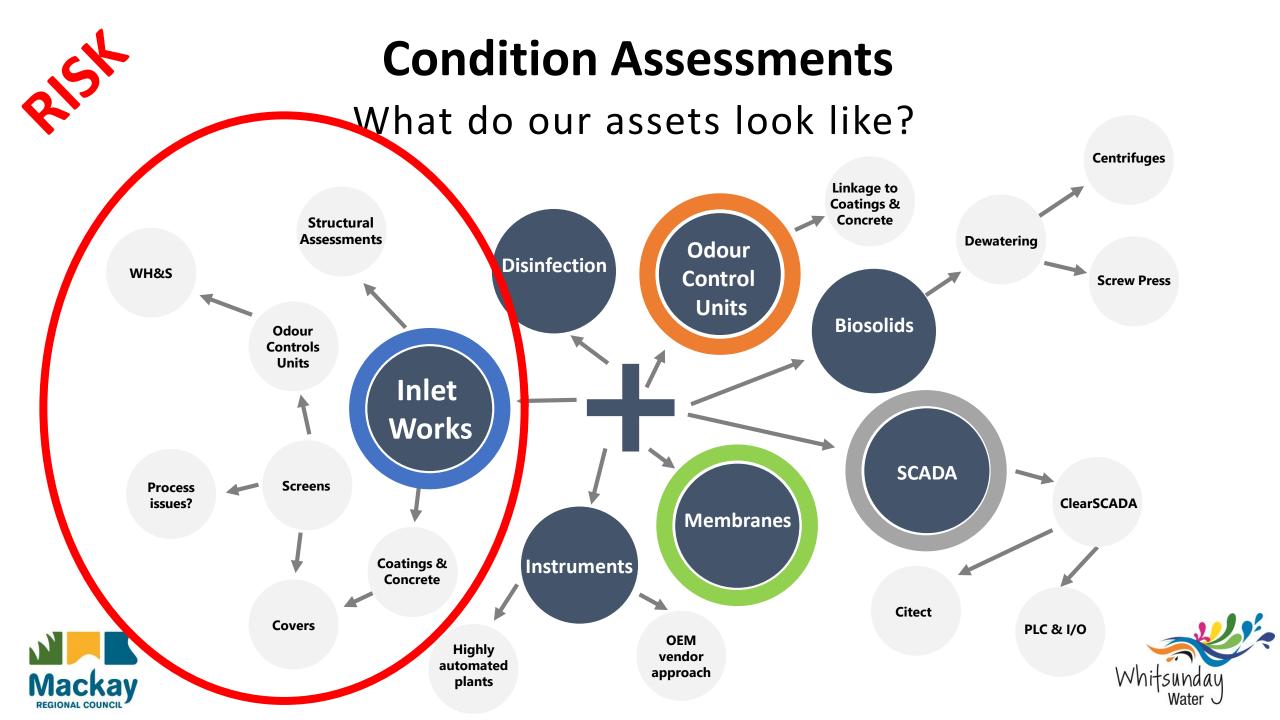

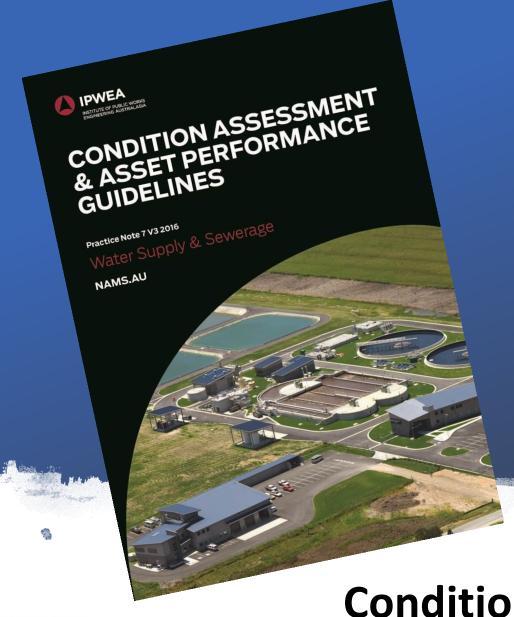

- 21,300 EP
- Design ADWF: 4.90 ML/d
- Current ADWF: 2.9-3.7 ML/d
- Activated sludge (2 SBR), disc filtration, disinfection, UV
- Tidal discharge to Reliance Creek

Mackay North Water Recycling Facility (MNWRF)

- Technical report
- Remedial scope of work
- +/- 30% cost estimate
- High level remedial works schedule

Condition Assessments

Bypassing inlet works?

- Workplace health & safety
- Environmental compliance
- Process risk

- 1. Inlet Works
- 2. Bioselector & Bioreactor (x2)
- 3. Old Inlet Works
- 4. Old Bypass
 Balance Tank
- 5. General Purpose Pump Station

- 1. Inlet Works
- 2. Bioselector & Bioreactor (x2)
- 3. Old Inlet Works
- 4. Old Bypass
 Balance Tank
- 5. General Purpose Pump Station

Cannonvale STP Inlet Works Structural Condition Assessment

- 1. Inlet Works
- GeneralPurpose PumpStation
- 3. Bioselector & Bioreactor (x2)
- 4. Old Inlet Works
- 5. Old Bypass
 Balance Tank

- 1. Inlet Works
- 2. GeneralPurpose PumpStation
- 3. Sequence
 Batch Reactors
 (SBRs, x2)

Decommissioned drying beds & old pump station

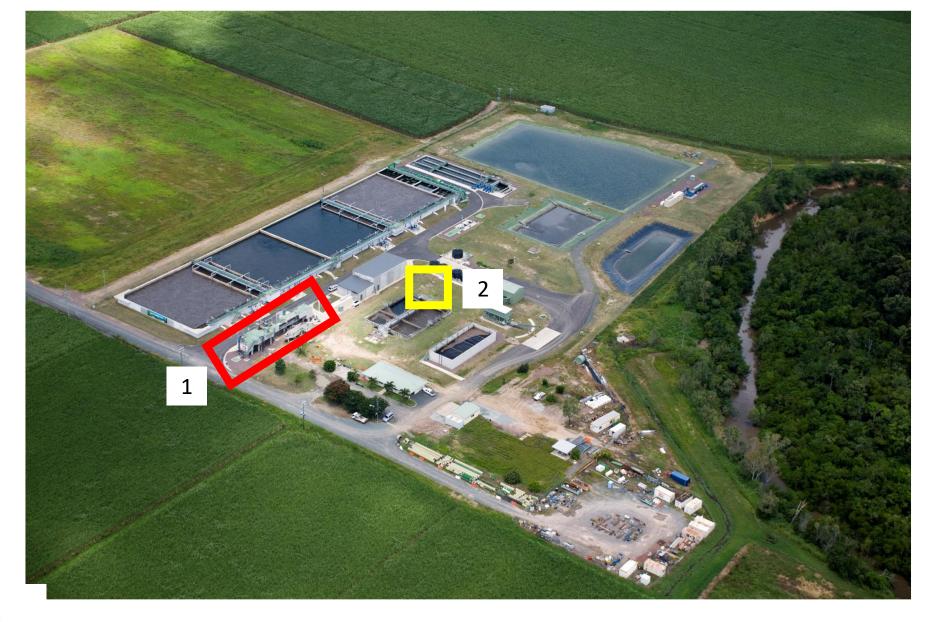

MNWRF Inlet Works Structural Condition Assessment

- 1. Inlet Works
- 2. GeneralPurpose PumpStation
- 3. Sequence
 Batch Reactors
 (SBRs, x4)

- 1. Inlet Works
- GeneralPurpose PumpStation
- 3. Sequence
 Batch Reactors
 (SBRs, x4)

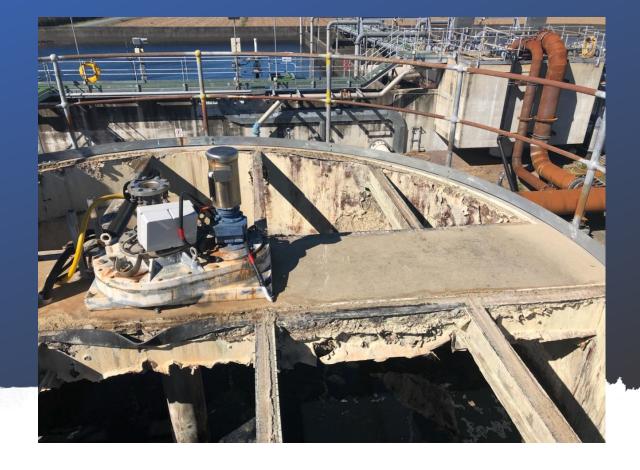

MSWRF Inlet Works Structural Condition Assessment

COMMON FINDINGS

Linkage to odour control?

01

Concrete deterioration & friability

02

Protective coating damage & delamination

03

Installation issues

04

Hydrogen sulphide attack

05

Odour control covers

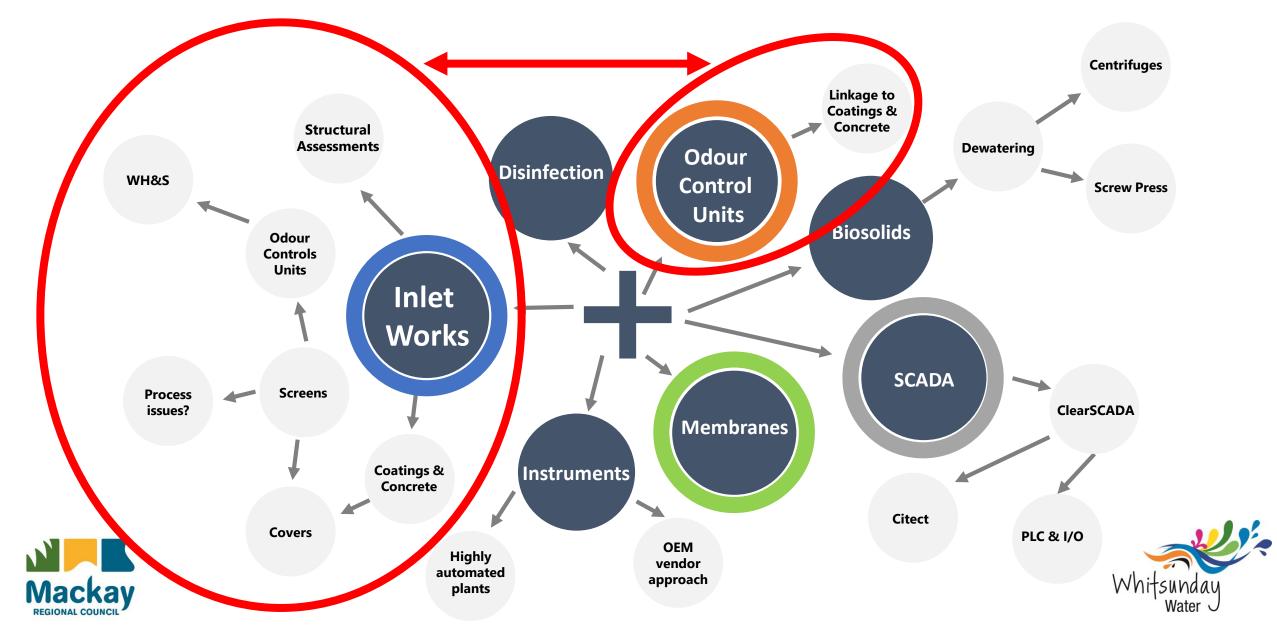

Plant Area	Estimated Date of Construction	Condition Rating Score (0-5)
Cannonvale STP inlet works	2014	3 (fair or moderate, maintenance required)
Cannonvale STP bioselectors & bioreactors	2014	2 (very good, requiring normal / routine maintenance)
Proserpine STP inlet works & bioselectors	2013	2 (very good, requiring normal / routine maintenance)
MNWRF inlet works	2008	4 (poor, requiring renewal or significant remedial works)
MNWRF GPPS	Refurbished 2008	3 (fair or moderate, maintenance required)
MSWRF inlet works	2008	4 (poor, requiring renewal or significant remedial works)
MSWRF GPPS	Refurbished 2008	3 (fair or moderate, maintenance required)

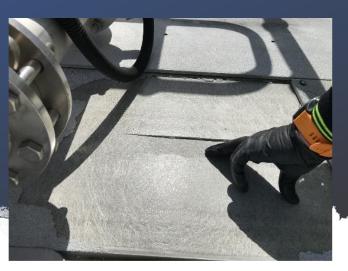

CLOSING THE LOOP

Asset Life & Condition Assessments

Whitsunday Water:

- Jason Raiteri (Director Engineering Services)
- Troy Pettiford (Chief Operating Officer, Whitsunday Water)
- Peter Stapleton (Treatment Operations Manager)
- All Whitsunday Water & WRC staff involved in this project

Mackay Regional Council:

- Jason Devitt (Director, Engineering & Commercial Infrastructure Services)
- Nicole Davis (Chief Operating Officer, Water & Waste)
- Stuart Boyd (Manager, Water Treatment)
- All MRC personnel involved in this project
- QWRAP, Queensland Government, qldwater, LGAQ
- Gary Edwards @ DGH Engineering (Planning & Project Delivery)
- Nilesh Prasad, Stuart Bailey, Michael Mckeown, Scott Downer @ Jacobs (Structural)
 - Ian Evanson, Glen Hadiardja, Dominic Gibbs, Anh Ho @ Stantec (Odour Control)
 - Contract Manager, Denis Baker @ CEENA
