

The future has
begun...

...and it's in our cities

GRAHAM COLCLOUGH

ONE CONFERENCE: APRIL 2014, BRUSSELS

A Powerful Context...

2

The accelerating growth of cities, and their disproportionate consumption of physical and social resources, is assessed by the United Nations to be the greatest challenge to mankind since we became social

What generation are our cities?

1

ASK MOTHER
NATURE FOR
THE ANSWER ...

the Lindsey Creek
Redwood

- The single, big central structure

Cleverness
Central planning

- 4 times taller and 20 times heavier than a whale
- Height of 120 meters
- 2000 years old

Integrity of central system
- Not ultimately adaptable to the environment

2

pando, utah

- World's largest organism by mass
- Male quaking aspen tree
- Clonal colony with 47,000 trees on it

Its' genius:
Massive infrastructure or spine, underground.
The trees COME AND GO BUT the infrastructure SURVIVES

3

Honey Mushroom
Oregon

- Biggest single organism

- Good genes
- Unique ability
- Nature's version of a market driven
- Dangerous when unregulated
- It puts back little

4

Neptune
Sea Grass, Ibiza

- Opposite logic to pando and HM
- It delivers all the resources and goodness possible and distributes the life-giving energy to the leaves (the "frontline" if you will)

5

Ant colony

"Two things we learn from nature:

1. the organising principles, the core logic of the system
2. the underlying technology or special natural talent which makes that system possible"

How to achieve 4th & 5th Generation intelligence for our Cities?

Big shifts in thinking...and actions

...from

to...

- Politics
- Bureaucracy
- Country boundaries
- (Modest) fund availability
- People-centric
- Data exploitation
- Collaboration & Protocols
- Innovative funding & business models

Many similarities – yet we focus on the differences!

European Innovation Partnership on Smart cities and communities

Strategic Implementation Plan

Draft version 14

European Commission action

**Sustainable Urban
Mobility**

**Sustainable Districts
& Built Environment**

**Integrated
Infrastructure &
Processes**

Citizen Focus

how we build society into the process as an integral actor for transformation and beneficiary of gains

Policy & Regulation

creating the enabling environment to accelerate improvement

Integrated Planning

how we work across sector and administrative boundaries; and manage temporal goals

Knowledge Sharing

how we accelerate the quality sharing of experience to build capacity to innovate and deliver

Metrics & Indicators

enabling cities to demonstrate performance gains in a comparable manner

Open Data

understand how to exploit the growing pools of data; making it accessible – yet respecting privacy

Standards

providing the framework for consistency commonality and repeatability, without stifling innovation

Business Models, Procurement & Funding

integrating local solutions in an EU and global market

Two EC calls for action:

- H2020 Call for Proposals
- Invitation for Commitment (IfC)

► H2020 Call for Proposals

- €200 mln (split 2014 / 2015) under 3 DG Research programmes to scale up and accelerate smart city activities
- Can be considered 'seed funds' to provoke a new way of (wave III) working

► Invitation for Commitment

- Commitment to the ambitions and principles of the Strategic Plan (SIP)
- An offer of resource commitment from all city stakeholders
 - In kind (expertise; resource; 'product'); financial; test sites;...
- A means to collaborate to access 'scale' funds from multiple sources
 - Structural; National; City; Industry; Investor; Crowdsourced;...

Key Terms....

Scale – Acceleration – Impact ...thru... Collaboration – Common Solutions – Integrated Approach

Some potential (IfC) ideas...

Rapid Action – Rapid Benefits

- ❑ 100 City – Industry – NGO transfers starting now!
- ❑ City Advisory Boards

Medium Term quantum improvement

- ❑ The “Humble Lamppost”

Two ‘gaping holes’

- ❑ Integrated City Simulation & Visualisation for Planning
- ❑ City Information Platform

The “Humble Lamppost” ...the aspirin for cities

- ▶ *“A million new lampposts across Europe”*
- ▶ Delivers:
 - ▶ Quantum financial savings: capital investment; and operational costs (energy consumption; maintenance)
 - ▶ Re-use of existing infrastructure (CCTV; WiFi; Security; Air Quality measurement; Transport monitoring;...)
 - ▶ Toolkits for Cities (to repeat successes)
 - ▶ RD&I Agenda
- ▶ Impacts:
 - ▶ Districts (Place making); Integrated Infrastructures; (Transportation)
- ▶ Requires:
 - ▶ New Business Models
 - ▶ Standardisation
 - ▶ Integrated planning & operations
- ▶ Aggregation of demand across cities

Sustainable Urban Mobility	Sustainable Districts & Built Environment	Integrated Infrastructure & Processes

C

► R
C

► T

► R

► Impa

► D
(1

► Require

► New Business Models

► Standardisation

► Integrated planning & operations

► Aggregation of demand across cities

Potential Commitments:

- **Lighting Industry:** RD&I funds
- **(Local SME) Service Providers:**
- **Funders:** new commercial models (& money)
- **Standardisation Bodies:** specifications
-

Integrated Planning - systems modelling & visualisation

Sustainable Urban Mobility	Sustainable Districts & Built Environment	Integrated Infrastructure & Processes
Citizen Focus		
Policy & Regulation		
Integrated Planning	11	
Knowledge Sharing		
Metrics & Indicators		
Open Data		
Standards		
Business Models, Procurement & Funding		

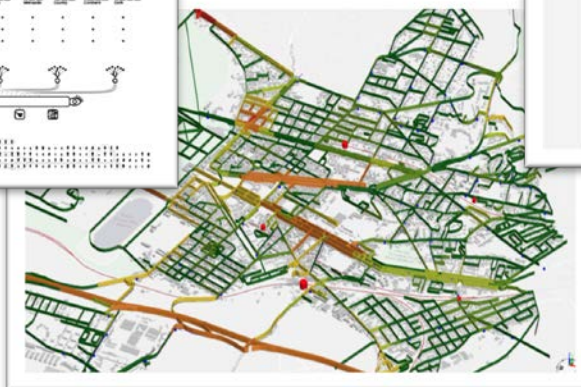

► “Digital City Planning”

- Streamlined internal administrative processes
- Digitally captured integrated 3D plans; simulation and scenario building
- Connecting: Masterplanners; Politicians; Infrastructure providers; Service Providers; Society
- Address how ‘hard’ and ‘soft’ infrastructures interplay (over time)
- A generic integrated city model & proven set of modelling tools (‘Sim city’ - just not a game!)

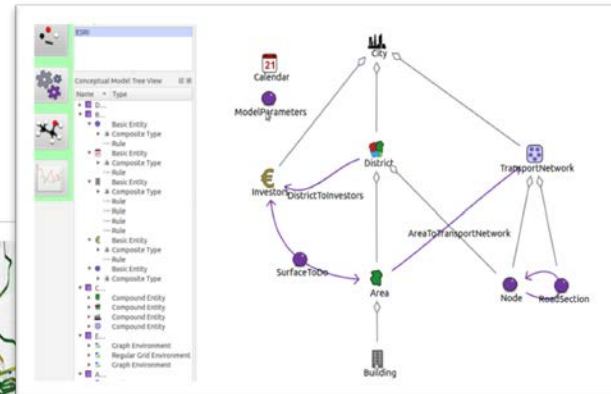

Conceptual City Systems Model

Geo-Spatial Systems Model

Physical Visualisation

Linked Systems Models

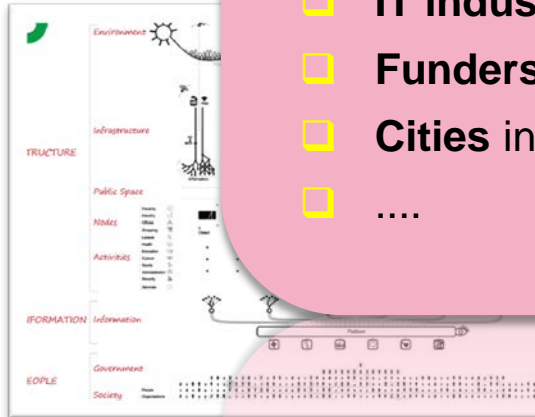

Integrated Planning - systems modelling & visualisation

Sustainable Urban Mobility	Sustainable Districts & Built Environment	Integrated Infrastructure & Processes
Citizen Focus		
Policy & Regulation		
Integrated Planning		
Knowledge Sharing		
Metrics & Indicators		
Open Data		
Standards		
Business Models, Procurement & Funding		

12

Potential Commitments:

- **SME** O.R. model & visualisation tools (existing FP 7 project)
- **Academia** - expert audit & review
- **City Networks**: Urban Anatomy conceptual model)
- **Built Environment Industry** - funds (stand to gain)
- **IT industry** - stitch all data together
- **Funders / Investors & Insurance** companies - funds
- **Cities** in collaboration - proof points

City Information Platform – A solution for “City Fence-Sitters”

► A solution for “City Fence-Sitters”

► Context

- Present ‘silo’ operations
- Limited common & integrated use of 5 major data sources

► Impacts

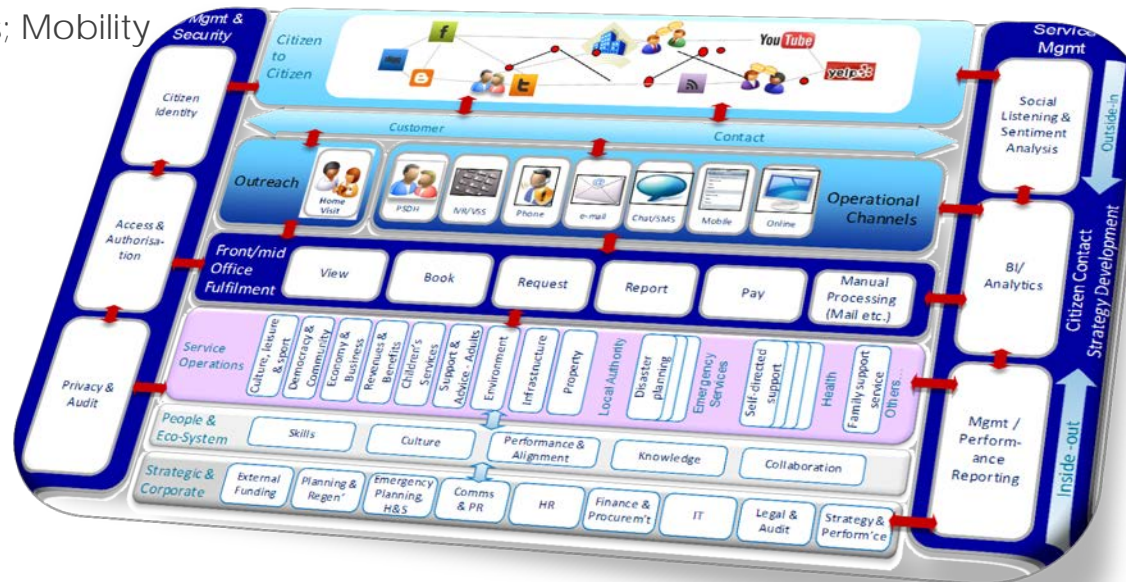

- Integrated Infrastructure; Districts; Mobility
- ...and all other city domains!

► Requires

- Common Protocols (standards)
- Data Mgmt
- Integrated planning

► Delivers

- City / industry market evaluation
- Logical design
- Proof of concepts

City Information Platform – A solution for “City Fence-Sitters”

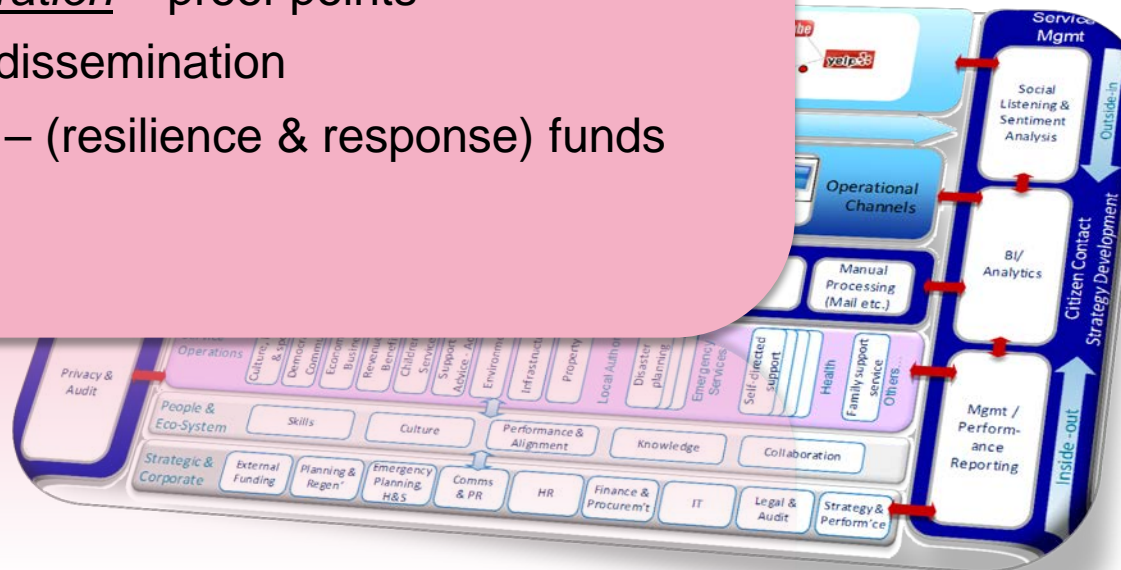

Sustainable Urban Mobility	Sustainable Districts & Built Environment	Integrated Infrastructure & Processes
Citizen Focus		
Policy & Regulation		
Integrated Planning		
Knowledge Sharing		
Metrics & Indicators		
Open Data Standards		
Business Models, Procurement & Funding		

14

Potential Commitments:

- ❑ **IT industry** – collaborate for common protocols
- ❑ **SME** – niche component solutions
- ❑ **Academia** – objective challenge
- ❑ **Cities** in collaboration – proof points
- ❑ **City Networks**: dissemination
- ❑ **Insurance Cos.** – (resilience & response) funds
- ❑

- ▶ A solution
- ▶ Content
 - ▶ Privacy & Audit
 - ▶ People & Eco-System
 - ▶ Operations
 - ▶ Strategic & Corporate
- ▶ Impact
 - ▶ In
 - ▶ ...
- ▶ Requirements
 - ▶ C
 - ▶ Data
 - ▶ Integrated
- ▶ Delivers
 - ▶ City / industry market evaluation
 - ▶ Logical design
 - ▶ Proof of concepts

So many ways ICT can help transform our cities...

Governance

- *Understanding society*
- *Connecting with (& empowering) people*
- *Informing leadership*
- *Enabling collaboration*
- *Connecting across public agencies*

Services

- *Getting around the city*
- *Care of the Elderly*
- *Community safety*
- *Transforming energy consumption*
- *Supporting SMEs! (business friendly cities)*

Infrastructure

- *Getting control of public assets*
- *Connected Infrastructures (IoT)*
- *Disruptive ICT ('SMACS')*

Just go to it !

GRAHAM COLCLOUGH

THANKS!
