

# Sustainable Waste Management – Changing the Way We Keep Our Cities Clean

Mason Willis  
City of Adelaide

31<sup>st</sup> May 2019

# Asset management is the coordinated activity of an Organisation to realise value from its Assets

**\$1.7billion worth  
of assets**

*Urban Elements*

*Lighting and Electrical*

*Transportation*

# Asset Management

Aligned to Strategic Objectives

# Asset Management at City of Adelaide

A photograph of a modern building with a glass and metal facade, featuring a large blue triangular graphic overlay with the word 'SMART' in white.

SMART

BY 2020, OUR CITY'S ECONOMY  
WILL BE GROWING FASTER THAN  
THE AUSTRALIAN ECONOMY

A photograph of a modern building with a glass and metal facade, featuring a large green triangular graphic overlay with the word 'GREEN' in white.

GREEN

CITY CARBON EMISSIONS WILL  
BE REDUCED BY 35% FROM THE  
2006-07 BASELINE BY 2020

# Asset Management at City of Adelaide

**LIVEABLE**

THE NUMBER OF PEOPLE LIVING  
IN THE CITY WILL HAVE GROWN  
FROM 23,000 TO 28,000 BY 2020

**CREATIVE**

THE NUMBER OF PEOPLE THAT  
ARE VISITING THE CITY EACH  
DAY FOR SHOPPING, LEISURE  
OR ENTERTAINMENT WILL  
HAVE GROWN FROM 111,000 TO  
117,000 BY 2020

# The Waste Management Challenge

## Global

The link between waste and climate is becoming more and more evident

**Reduce, Reuse, Recycle** - effective if the whole cycle is connected

*“The 3Rs represent a major economic opportunity to society. Making less that goes to waste saves business money: On raw material, energy and labour costs”.*

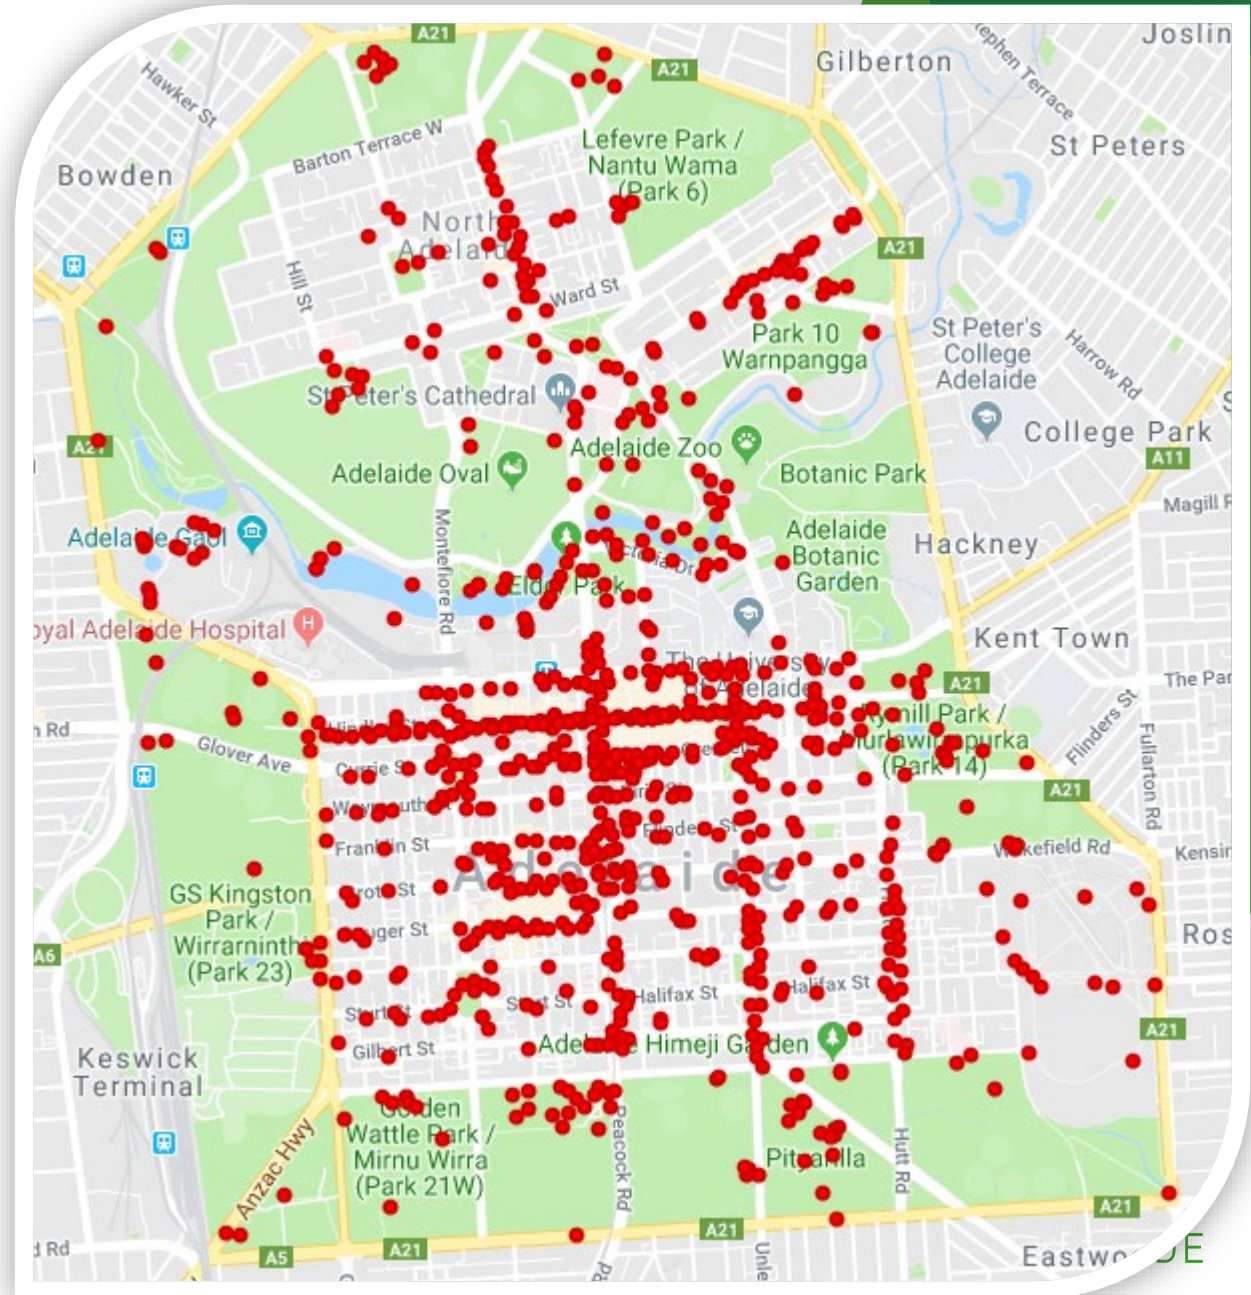

# Current Network

862 Bins

Parklands and CBD areas

Collections once per day

- Exception of Hindley St, Rundle Mall and Rundle St – twice per day.

# Current Practice

**CBD and Parks  
collection schedules**

**862 Bins**

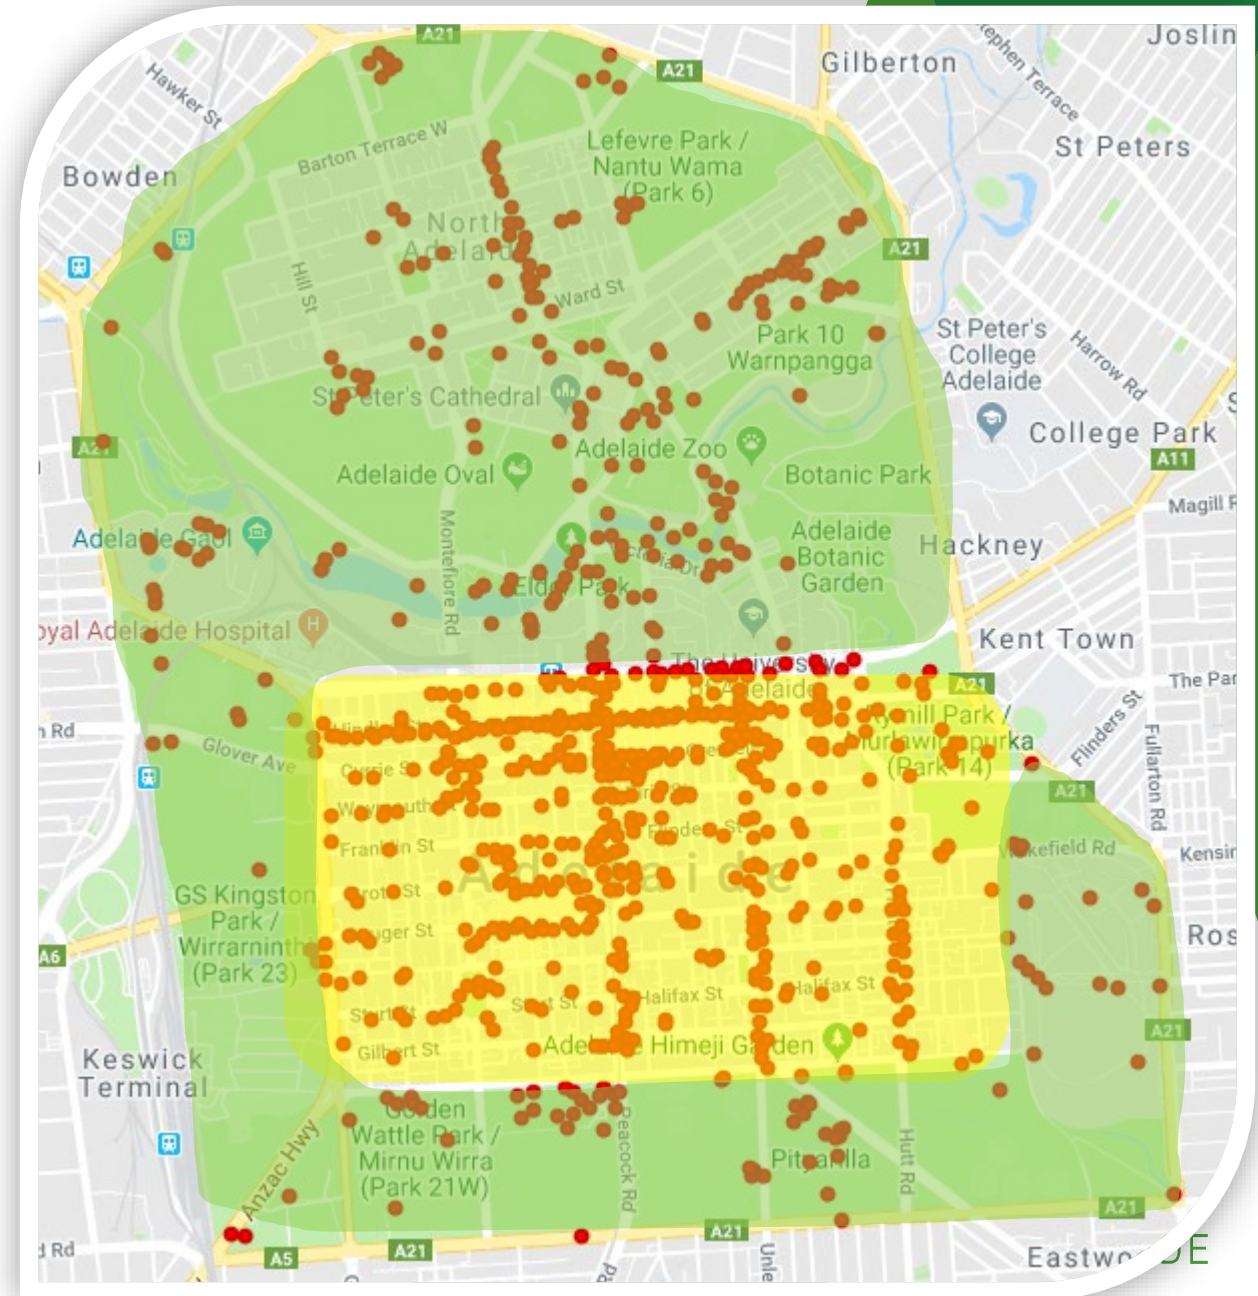

**Bin size: 140 or 240 Litre**

**Network Calculation:**

**Angas Street has 11 Bins**

**4 are collected Daily  
7 are collected twice weekly**

**Total waste collection potential: 5880 Litres**

# Current Practice (2)

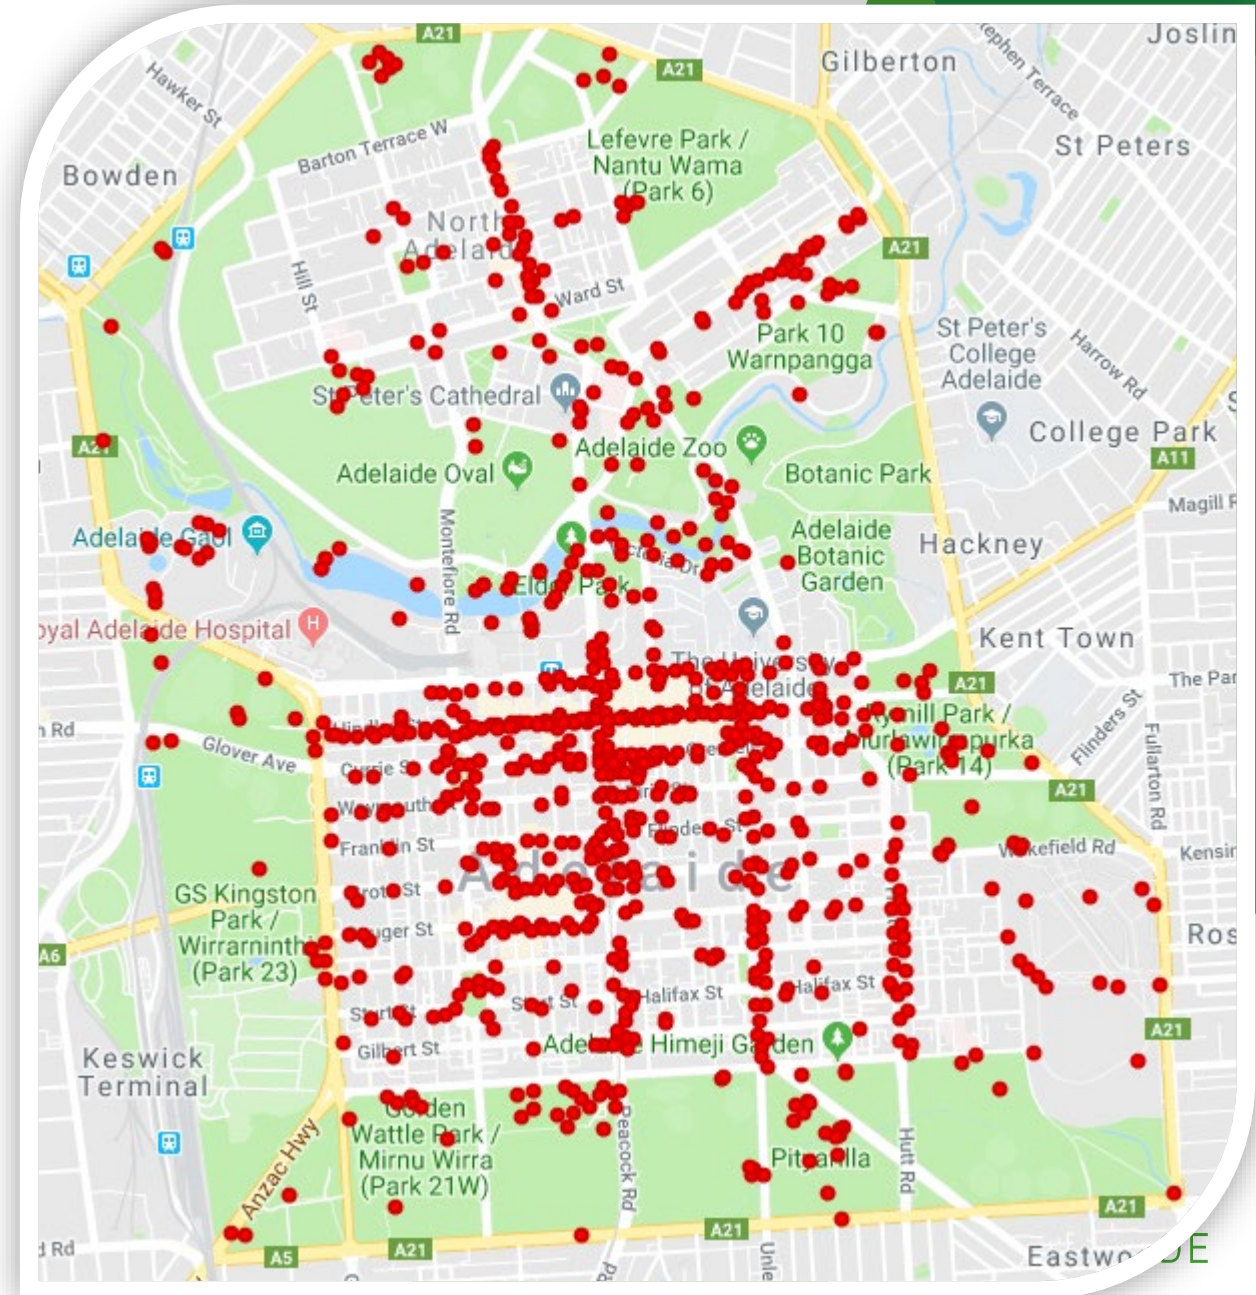

Extrapolated across the network:

Capacity for collection: 912,000 Litres

An Olympic Size Swimming Pool is 2.5ML  
(2,500,000 Litres)

Is the bin always full?

Opportunities for efficiencies

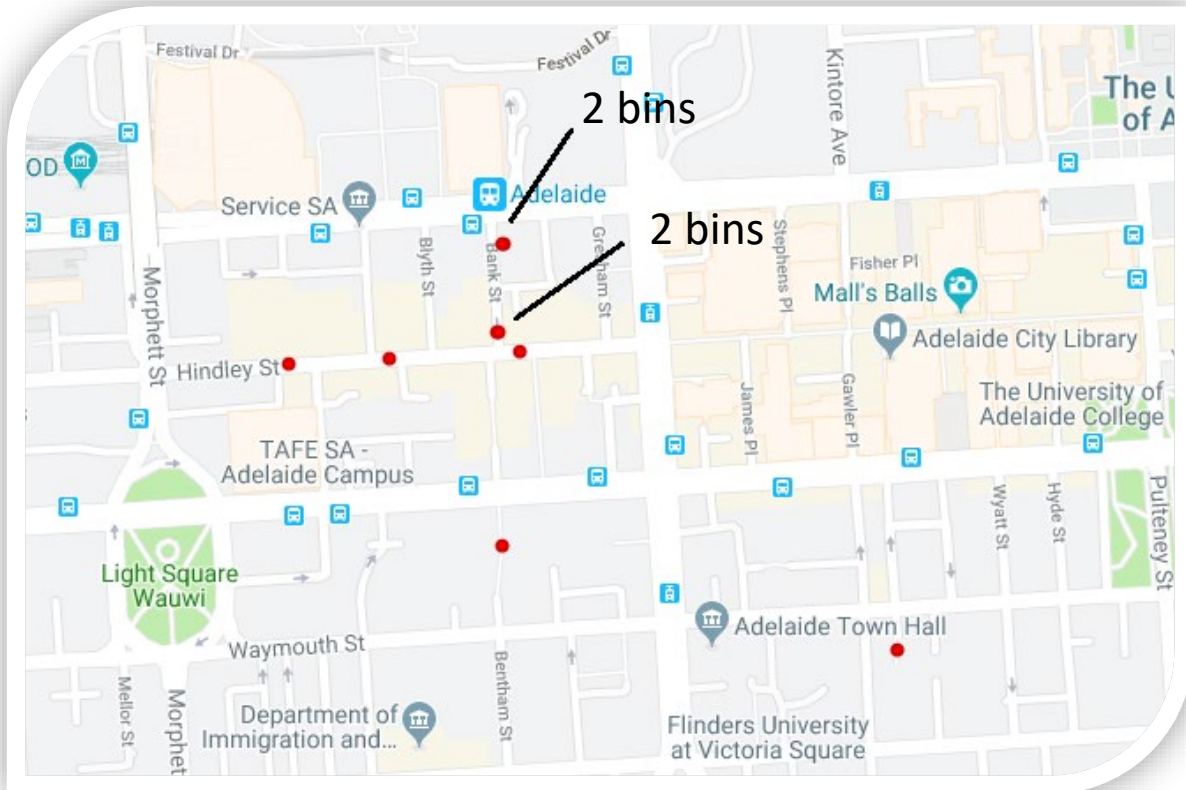

# Efficiency Opportunities

Smart City Program, in 2017 introduced:

9 x Clean Cubes

24 x Clean Flex sensors

Major consideration: Overflows

High Traffic Areas in Hindley Street

Past complaints

# Efficiency Opportunities (2)

# Efficiency Opportunities (3)

The Clean Cube use solar power to drive a compaction plate

One full charge can last 4 weeks

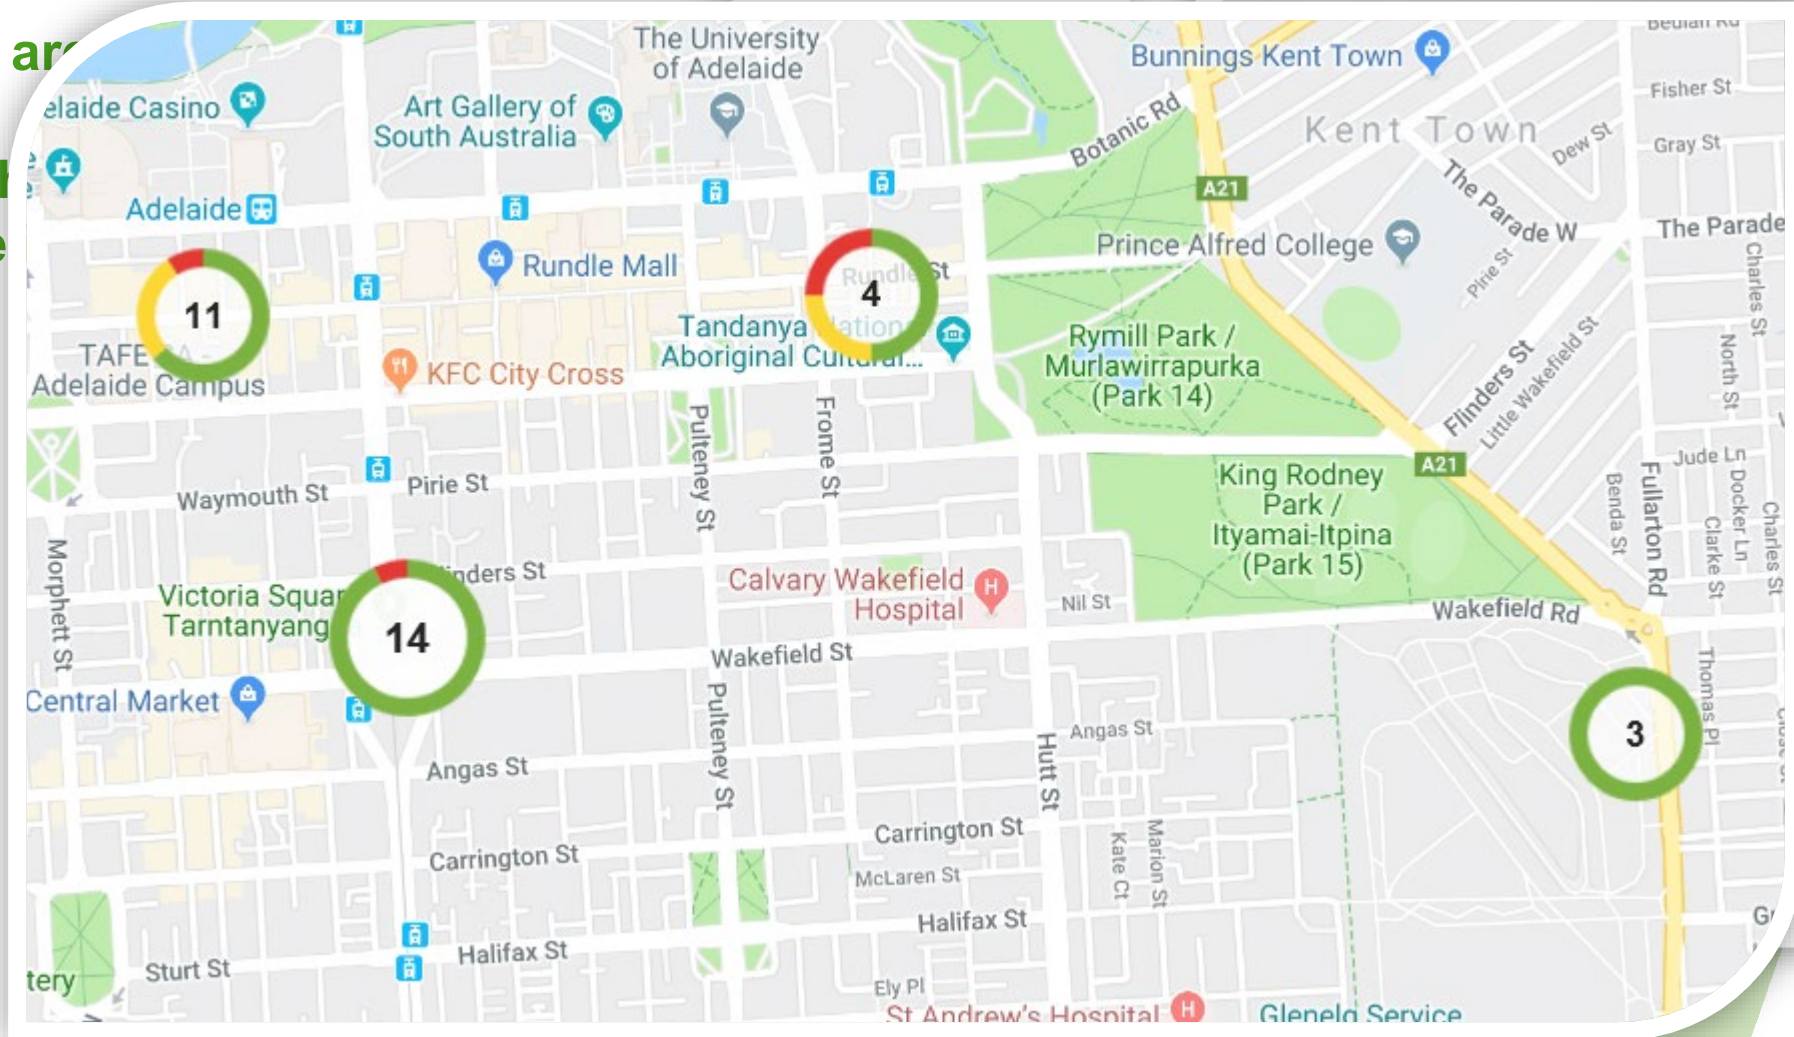

Up to 720  
kgf

# Efficiency Opportunities (4)

These bins are  
They take the  
that we use

Fill-level History

25/05/2019 - 27/05/2019

Map

Adelaide

# Trial at City of Adelaide

## Key objectives:

1. Understand technology
2. Quantify benefits
3. Gauge operational feedback

## 2 trial time periods:

September 10<sup>th</sup> to October 21<sup>st</sup> 2018 (6 weeks)

January 1<sup>st</sup> to April 1<sup>st</sup> 2019 (13 weeks)

# Trial Period 1

Bin Location	Pre-compaction Collections	Trial Collections	% saving
CoA 25 Pirie St	42	6	86%
CoA Bank St North (North)	42	11	74%
CoA Bank St North (South)	42	16	62%
CoA Bank St South	42	10	76%
CoA Hindley P/H (Twice daily)	84	12	86%
CoA Hindley McD's (Twice daily)	84	15	82%
CoA 240L Hindley KFC	84	9	89%
		Av.	79%

420 weekly collections for these bins normally

The Smart City Portal revealed that there was a decrease in collections on an average of **79%** during the trial

A potential for reducing collections by **79%**

# Trial Period 1 (part 2)

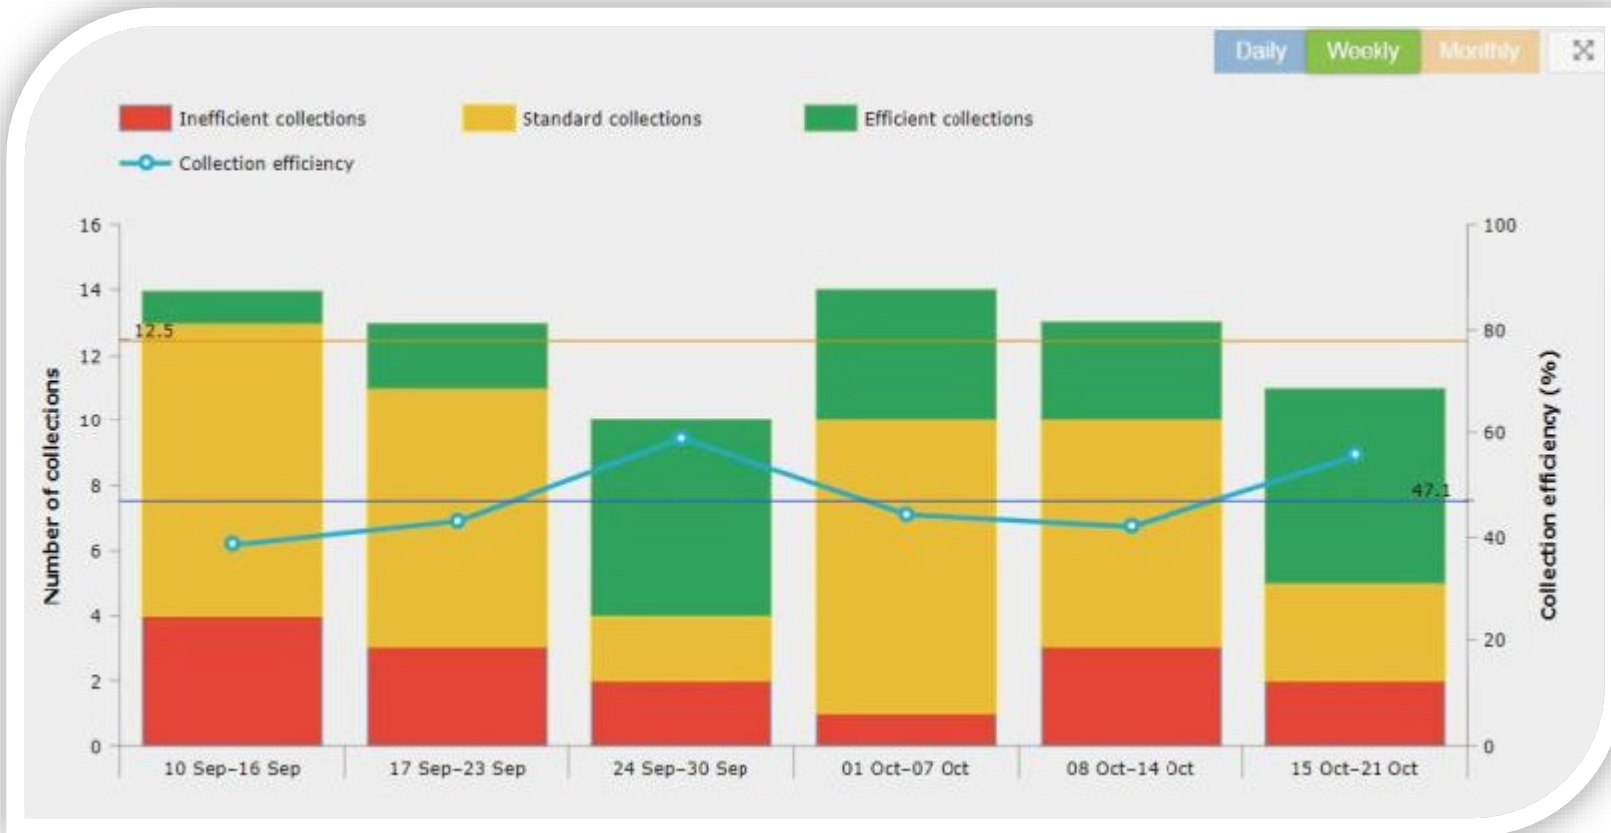

**Collection efficiency:** the rate of collection when required, i.e. when the bin is full (over 50%)

<i>Bin Location</i>	<i>Total Waste Generation (L)</i>	<i>Collection Efficiency* (%)</i>
<i>CoA 25 Pirie St</i>	475	50
<i>CoA Bank St North (North)</i>	392	35
<i>CoA Bank St North (South)</i>	1155	53
<i>CoA Bank St South</i>	688	43
<i>CoA Hindley P/H (Twice daily)</i>	565	38
<i>CoA Hindley McD's (Twice daily)</i>	1104	55
<i>CoA 240L Hindley KFC</i>	945	41

The units in some cases were collected below their optimal collection fill-level of 50%

# Trial Period 1 (part 2)

Inefficient collection frequency

**15 times**

60% more inefficient collections on **10 Sep-16 Sep** than the average

60% less inefficient collections on **01 Oct-07 Oct** than the average

# Trial Period 2

1<sup>st</sup> January 2019 to 1<sup>st</sup> April 2019

Same potential for  
collection improvement  
over both trial periods

Bank Street North

Normal Daily Collection  
= 91 over the period

Down to 17 times (1.3  
per week)

Reduction in collection  
of **81%**

# Clean Flex Smart Sensor Trial

CoA Ebenezer Place #1 (FB1000001712AA98)

## Fill-level History

01/01/2019 - 01/04/2019

- The sensor along Ebenezer overflows constantly and requires collection daily
- Location receives high level 'dumping' from unknown sources
- Location has now been swapped with CleanCube from Pirie St

Collection efficiency around 70%

# Clean Flex Smart Sensor Trial (2)

Bin	L/day
CoA Ebenezer Place #2	96.4
CoA Ebenezer Place #1	86.6
CoA Vardon Ave #2	57.3
CoA Vic Park 1 Grandstand	45.8
CoA Vardon Ave #1	40.2
CoA Vic Park 2 Sweat Track	35.5
CoA Vic Park 5 Park 3 Full Rd	35.1
CoA Vic Park 3 Path 1 Halifax	31.8
CoA Vic Square 11	28.7
CoA Hindley KFC Recycling	28.5
CoA Vic Square 5+6	25.2
CoA Vic Square 9+10	24.9
CoA Vic Square 1+2	22.8
CoA Vic Park 4 Path 2 Middle BBQ	22.2
CoA Vic Square South 14R	21.6
CoA Vic Square 11+12	20.8
CoA Vic Square 5	19.8
CoA Vic Square 7+8	19.3
CoA Vic Square 7	18.0
CoA Bank St North (South)	17.9
CoA Vic Square 1	17.1
CoA Hindley McD's (Twice daily)	16.7
CoA 240L Hindley KFC	16.6
CoA Vic Square 3	15.8
CoA Hindley McD Recycling	15.7
CoA Bank St South	13.8
CoA Bank St North (North)	10.1
CoA Hindley P/H (Twice daily)	8.9
CoA Hindley P/H Recycling	7.5
CoA 25 Pirie St	7.5
CoA Vic Square 9	5.7

3rd Nov: 5pm-8pm – 90% increase

- The CleanFlex sensors have allowed us to focus on areas with suspicious activity
- If we are to maintain high levels of service, then we must allocate costs (cleaning/collections) fairly.

- A secondary benefit that has

# Operational Feedback

A sensor detect a blockage in the aperture

However, a blocked aperture can indicate a full bin- go to pick it up, and its not

Compacting can split the bin

Odour / cleaning

Preferences

# The Future: Recycling

A decision was made in Adelaide to unlock chassis of normal bins to allow for can collection

Unable to do this with compactor bins

A wider waste management strategy is being developed at Adelaide

Recycling compactor bins are available

# The Future: Advertising

Potential to utilise/maximise the advertising opportunities on the Bins

Political decision

# Lifecycle Costing

	Clean Cube	Normal Suite Bin
Design Life	7	10
Capital Cost	\$5100	\$3000
Operational cost (cleaning/electricity)	\$2000 p.a.	\$500 p.a.
Maintenance	\$500 p.a.	\$200 p.a.
Salvage Cost	\$500	\$250
	\$23,100	\$10,250

**A potentially longer lifecycle cost**

**But....**

18/19 FY

- 9 Solar Bins installed
- Smart Sensors installed across City

- Data analysis
- Identification of locations for additional Solar Bins and sensors

19/20 FY

- Identification of locations for more Smart Bin Rollout
- Rollout commencing

20/21 FY

- Ongoing use of Smart Sensor data

Trial

Expansion

Rollout

Condition Assessment
